SUMMARY

- MDM Analyst with 5 years of IT experience specializing in the design, development, and implementation of enterprise-level Master Data Management (MDM) solutions. Proven expertise in leveraging the Profisee MDM platform to drive data accuracy and consistency across complex domains, including Provider and Member data.
- Architected and deployed enterprise-grade Profisee MDM solutions across multiple domains, including Provider and Member, to establish a unified "Golden Record" and single source of truth.
- Optimized the Profisee FastApp portal for business data stewards, streamlining data editing, matching, and stewardship workflows to improve operational efficiency.
- Implemented hierarchical stewardship models featuring tiered approval workflows and automated data quality triggers to modernize data governance practices.
- Leveraged Microsoft Purview to establish a robust master data governance framework, facilitating enterprise-wide data discovery, lineage tracking, and metadata management.
- Directed data standardization and cleansing initiatives, integrating Melissa Address services in Profisee to enhance the accuracy of geographic master data.
- Developed custom data quality rules and validation controls to ensure the completeness, consistency, and regulatory compliance of critical business data.
- Built automated governance dashboards within Profisee to monitor key performance indicators (KPIs) related to data accuracy, duplication, and remediation status.
- Administered role-based access controls (RBAC) and security policies, safeguarding sensitive information while providing controlled access for custodians and stewards.
- Developed scalable ETL/ELT pipelines using Azure Data Factory and Microsoft Fabric to automate high-volume data ingestion from disparate sources into the MDM environment.
- Managed end-to-end data migrations and system integrations between Profisee and enterprise platforms, including CRM, ERP, and cloud data warehouses.
- Secured and optimized data processing workflows by utilizing Azure Key Vault for credential management and

TECHNICAL SKILLS

- **MDM tools:** Profisee
- **Programming and scripting:** SQL, Python
- **Databases:** SQL Server, PostgreSQL
- **Integrations:** Azure Data Factory, Fabric
- **Data Governance:** Purview
- **Tools and Frameworks:** Azure Data Studio, Visual Studio, GIT, Power BI, Power Query, Azure Storage Explorer, Microsoft purview
- **Cloud:** Azure Data Factory, Data Lake, Cosmos DB, Synapse Analytics, Databricks, Azure DevOps

WORK EXPERIENCE,

MDM Analyst, Vaya Pharma

Jan 2024- Dec 2025

- Architected and deployed comprehensive Profisee MDM solutions across multiple domains, including Provider and Member, to establish a unified "Golden Record" and single source of truth.
- Engineered sophisticated match/merge logic and survivorship strategies within the Profisee Fast App to ensure the accuracy and integrity of consolidated master records.
- Designed end-to-end MDM schemas, defining landing and staging tables, entities, foreign key relationships, and complex hierarchies to support enterprise data governance.

- Optimized the Profisee FastApp portal for business data stewards, enabling efficient data editing, matching, and stewardship workflows.
- Implemented tiered stewardship models with hierarchical approval workflows and automated data quality triggers to streamline governance operations.
- Deployed Microsoft Purview to establish a robust master data governance framework, facilitating enterprise-wide data discovery, lineage tracking, and metadata management.
- Designed and executed data standardization and cleansing processes, utilizing Melissa Address integration to enhance the accuracy of geographic master data.
- Developed custom data quality rules and validation controls to maintain the completeness, consistency, and integrity of critical business assets.
- Built automated governance dashboards within Profisee to track key performance indicators (KPIs) related to data accuracy, duplication, and remediation metrics.
- Administered role-based access controls (RBAC) and security policies, ensuring secure data handling for stewards and custodians while maintaining regulatory compliance.
- Developed scalable ETL/ELT pipelines using Azure Data Factory and Microsoft Fabric to automate data ingestion from diverse sources into the Profisee MDM environment.
- Managed end-to-end data migrations and integrations between MDM platforms and enterprise systems, including CRM, ERP, and Data Warehouses.
- Utilized Azure Key Vault and Integration Runtimes to secure and optimize data processing workflows within high-availability cloud environments.
- Identified and remediated complex data quality issues through root-cause analysis, collaborating with cross-functional teams to prevent recurrence and improve data health.

Data Analyst , Iso Whiz

Feb 2020 – Jun 2023

- Executed automated data quality checks with cloud function, resulting in an improvement in data accuracy.
- Ensured data security and ethical data handling practices, including protecting sensitive information
- Define and implement data quality rules to ensure accuracy, consistency, and completeness of data.
- Identify, investigate, and resolve data quality issues, collaborating with cross-functional teams to ensure timely remediation.
- Align data quality efforts with enterprise data governance standards and best practices to maintain compliance and integrity
- Design and develop interactive dashboards and reporting tools to monitor data quality metrics and trends.
- Collaborate with business and technical stakeholders to understand data needs and translate them into actionable data quality improvements
- Continuously evaluate and refine data quality frameworks, leveraging feedback and analytics to improve domain reliability and enterprise readiness.
- Lead data quality assessments and audits, providing recommendations and action plans to address gaps and improve overall data trustworthiness
- Document data quality rules, definitions, and processes to ensure clarity, consistency, and ease of maintenance across the organisation.

EDUCATION

Master of Science, Information Systems

University of North Texas, Denton, Texas
